Mathematical Formulae (Green)

Items included with question papers

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions. Write your answers in the spaces provided in this question paper. When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 8 questions in this question paper. The total mark for this paper is 75.

There are 24 pages in this question paper. Any blank pages are indicated.

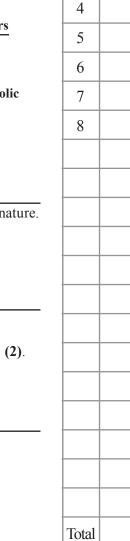

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled. You should show sufficient working to make your methods clear to the Examiner. Answers without working may not gain full credit.

Figure 1

Figure 1 shows a sketch of the curve with equation y = f(x). The curve passes through the origin O and the points A(5, 4) and B(-5, -4).

In separate diagrams, sketch the graph with equation

(a)
$$y = |\mathbf{f}(x)|$$
, (3)

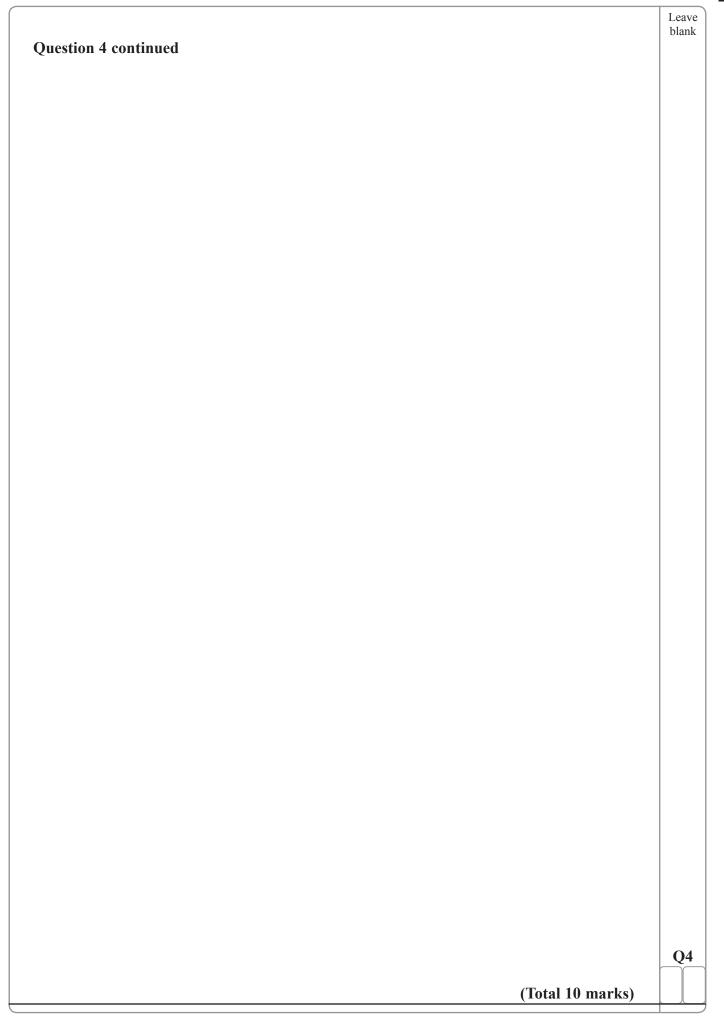

(b)
$$y = f(|x|)$$
, (3)

(c)
$$y = 2f(x+1)$$
. (4)

On each sketch, show the coordinates of the points corresponding to A and B.

The madicactive decay of a material is a insent.	
5. The radioactive decay of a substance is given by	
$R = 1000e^{-ct}, t \geqslant 0.$	
where R is the number of atoms at time t years and c is a positive constant.	
(a) Find the number of atoms when the substance started to decay.	(1)
It takes 5730 years for half of the substance to decay.	
(b) Find the value of c to 3 significant figures.	(4)
(c) Calculate the number of atoms that will be left when $t = 22 920$.	(2)
(d) In the space provided on page 13, sketch the graph of R against t .	(2)

6. (a) Use the double angle formulae and the identity

$$\cos(A+B) \equiv \cos A \cos B - \sin A \sin B$$

to obtain an expression for $\cos 3x$ in terms of powers of $\cos x$ only.

(4)

(b) (i) Prove that

$$\frac{\cos x}{1+\sin x} + \frac{1+\sin x}{\cos x} \equiv 2\sec x, \qquad x \neq (2n+1)\frac{\pi}{2}.$$

(4)

(ii) Hence find, for $0 < x < 2\pi$, all the solutions of

$$\frac{\cos x}{1+\sin x} + \frac{1+\sin x}{\cos x} = 4.$$
